PERFORMANCE
is available in
three different
configurations.

BASIC

Basic equipment with the most important tools

ADVANCED

Expanded basic equipment with additional crimping and pressing pliers and other important tools (torx and socket wrench)

COMPLETE

more equipment regarding to mobile soldering (gas soldering iron)

A detailed description of the contents can be found on the following page.

Dimensions inside: 460 x 320 x 180 mm
Dimensions outside: 480 x 350 x 190 mm
Volume capacity: ca. 26 Liter
Weight empty case: ca. 3.700 g

This case was developed for service applications in the field of electricians. With the two expansion sets **ADVANCED and **COMPLETE** it is possible to upgrade the **BASIC** set to a service case for high demands.**

The compact shape and the textured surface give the case a high stability. The use of X-ABS plastic with an extremely non-slip and scratch resistant surface makes the case resistant to external influences. The high impact and break-resistant material makes the cases also „airworthy“, and withstands even harsh baggage handling.

An ergonomic handle, robust hinges with lid locking mechanism, tool boards made of moisture resistant and unbreakable plastic ConPearl®, with sewn pouches, two lockable barrel locks and a freely dividable bottom tray (height 60 mm) are the features of the case.
