

glass fibre contact cleaner brush Ø 4 mm (plastic body with metal tip)

Item No. **2-166**
in pen form with twist mechanism

Specification

for cleaning soldering or welding spots
for rust removal, polishing and grinding of smallest parts
for corrections or etchings
synthetic body with metal tip
bristles made of glass fibre
brush Ø 4 mm

length 120 mm
weight 10 g

Application and technology

Glass fiber contact cleaners serve the user in many areas as practical helpers. They are ideal for cleaning, polishing or sanding very small surfaces. These are used for the finest work in model making but they are also ideal for cleaning soldering or welding spots.

We recommend to try the glass fiber eraser in an invisible area. The eraser consists of a writing sleeve which is, depending on the size, a 2 or 4 mm thick glass fiber mine. The integrated turning or printing mechanism allows infinitely variable length variation of the glass fiber lead. If a mine is used up, it is simply exchanged for a replacement mine.
