

**glass fibre contact cleaner brush**  
**Ø 2 mm (plastic body with metal tip)**

**Item No.**            **2-168**  
with clip

**Specification**

in pen form with press mechanism  
for cleaning soldering or welding spots  
for rust removal, polishing and grinding of smallest parts  
for corrections or etchings  
body plastic with metal tip  
bristles made of glass fibre  
brush Ø 4 mm  
length 140 mm  
weight 12 g

**Application and technology**

Glass fiber contact cleaners serve the user in many areas as practical helpers. They are ideal for cleaning, polishing or sanding very small surfaces. These are used for the finest work in model making but they are also ideal for cleaning soldering or welding spots.

We recommend to try the glass fiber eraser in an invisible area. The eraser consists of a writing sleeve which is, depending on the size, a 2 or 4 mm thick glass fiber mine. The integrated press mechanism allows infinitely variable length variation of the glass fiber lead. If a mine is used up, it is simply exchanged for a replacement mine.
