

## Fiber optic pen type cleaner for MU/LC adapter connector

**Item No.** **2-172**

Applications for Fiber network panels and assemblies, Outdoor FTTX applications, Cable assembly production facility, Testing laboratories, Server, switches, routers and OADMS with LC/MU interface.

### Specification

Fiber Optic ONE-CLICK CLEANER designed to specially work well with the LC, MU connectors.

This instrument cleans the ferrule end faces removing dust, oil, and other debris without nicking or scratching the end face.

Cleaning micro fibres are densely stranded and debris free extendable tip reaches recessed connectors.

When pressed, the tip placed on the connector rotates 180 degrees and performs a cleaning movement with an acoustic click.

Made from anti static resin

Disposable with 800+ cleanings per unit  
detailed application description enclosed

length 180 mm

weight 21 g
