

## screwdriver handle with 5/32 inch magnetic bit holder

**Item No.** **4-106**  
2-component synthetic handle

### Specification

ergonomically shaped non-slip  
blade Ø 7.5 mm  
socket SW 4 mm (5/32 inch)  
material high-quality tool steel

length 110 mm  
weight 27 g

### Application and technology

The bit magnetic holder handle has a 4 mm (5/32 inch) hexagon socket and can be used with all common hexagonal C4 bits. It is particularly suitable as a holder for our torque adapters. As an ergonomically shaped multi-component handle made of non-slip plastic, it lies well in the hand and has a practical hanging hole for your workbench.
