

ESD screwdriver handle for C4 bits SW4 (5/32 inch)

Item No. **4-116**
suitable for all common C4 bits (4 mm)

Specification

ergonomically shaped non-slip
socket SW 4 mm (5/32 inch)
Holder outer-Ø 7.5 mm
Bit holder without magnet, clamp holder
dissipative ESD handle (conductance 10^5 to 10^7 Ohm)

length 95 mm
weight 31 g

Application and technology

For all work on electrostatically sensitive components, in connection with hexagonal C4 bits (5/32 inch). Thanks to the ergonomically shaped handle, the screwdriver sits perfectly in the hand.

The ergonomic handle of the screwdriver is made of ESD plastic (PP black) and has a surface resistance of 10^5 to 10^7 Ohm.
