

ESD tool holder VARIO tronics (without tools)

Art.-No.	5-090-0
Description	ESD tool holder VARIO tronics (without tools)
Application	for standing or hanging at the ESD workplace
Specification	Storage for two-legged tools
Material	steel sheet
Surface/Coating	ESD powder coated RAL 9005 black
Features	dissipative, abrasion resistant, stainless, stable
Surface resistance	10 ⁵ Ohm
Total length	measures 150 × 140 × 75 mm
Weight	weight 393 g

Application and technical data

The practical VARIO tronics tool stand is made of sturdy 1.5 mm sheet steel and has a high-quality and dissipative powder coating. In addition to pliers and tweezers, our handy screwdrivers or optionally round objects with a maximum diameter of 9 mm can also be stored. Blades or tips of the tools can be quickly identified and selected by means of the recess in the lower area. The locking aid at the rear edge additionally helps to keep each tool in position. Small lugs on the top edge of the hanging rail prevent pliers or tweezers from slipping down. The tool holder can be set up as well as hung up. Two holes on the back allow for easy mounting on the wall.

Often used in EPA areas where uncontrolled discharge of tools or objects must be avoided at all costs. (EPA suitable for work in electrostatic protected areas: ESD workstation / ESD protection zone).
