

ESD tool holder SQUARE (without tools)

Art.-No.	5-092-0
Description	ESD tool holder SQUARE (without tools)
Application	for setting up, hanging, wall mounting in a variety of ways
Specification	Stable storing hand tools such as pliers, tweezers and screwdrivers
Material	steel sheet
Surface/Coating	ESD powder coated RAL 9005 black
Features	dissipative, abrasion resistant, stainless, stable
Surface resistance	10^5 to 10^9 Ohm
Total length	measures 165 × 120 × 65 mm
Weight	weight 365 g

Application and technical data

The versatile tool stand SQUARE is made of 2.0 mm extremely stable sheet steel and has a high-quality gray powder coating. In addition to pliers, tweezers and screwdrivers, many other hand tools can be stored. Using the square recess, blades or the tips of tools can be quickly identified and selected anywhere. Long tools can be pushed through to the bottom and held in position as a locking aid. The well thought-out bends of the holder prevent pliers or tweezers from slipping down. The tool holder can be set up or hung on. Due to the many holes, it is possible to choose a personally meaningful wall mounting. With this, somewhat different holder, a lot is certainly possible.

Often used in EPA areas where uncontrolled discharge of tools or objects must be avoided at all costs. (EPA suitable for work in electrostatic protected areas: ESD workplace / ESD protection zone).
