

# Cutting tweezers (flush) 115 mm form 15 AP carbon-steel

<b>Art.-No.</b>	5-879
<b>Description</b>	Cutting tweezers (flush) 115 mm form 15 AP carbon-steel
<b>Application</b>	for soft wires up to $\varnothing$ 0.25 mm (copper wire, gold wire, silver wire, etc.)
<b>Specification</b>	for flush cutting, extremely hard and sharp, optimum sharpness of the cutting edges
<b>Material</b>	Carbon steel
<b>Surface/Coating</b>	matt finish
<b>Features</b>	antimagnetic, stainless, hard, heat-resistant, acid-resistant, non-reflecting
<b>Surface resistance</b>	/
<b>Shape</b>	CUT: Cutting
<b>Icon No.</b>	CUT1

## Dimensions and weight

A = 10 mm  
B = 8.5 mm  
angle = 20°

length 115 mm  
weight 25 g

## Application and technical data

High quality cutting tweezers made of carbon steel. Best suited for soft copper wire, gold and silver wire up to  $\varnothing$  0.25 mm. The cutting edges are particularly sharp and hard for flush cutting. With ESD coating article 5-879-13 we achieve a leakage resistance of  $10^6$  to  $10^9$  Ohm.

PLEASE NOTE: High humidity or touching with fingers (sweat) will cause carbon steel to rust. Therefore, the tweezers should always be kept dry or rubbed with oil if stored for a long time. If flash rust nevertheless forms on the tweezers or blade, it can be removed quite easily with a light sharpening.
